## PROFILE SUMMARY

MCA candidate specializing in Cloud Computing (2027 batch) with hands-on practice across core AWS services, containerization fundamentals, and applied AI/ML projects in computer vision and mobile app development. Built and shipped 3 independent projects spanning gesture-based computer vision, voice-assisted mobile apps, and full-stack mobile CRUD systems. Combines a builder's mindset with proven leadership coordinating a 25-member student team.

## KEY SKILLS

- Programming: Python, Java (Core + Advanced + Frameworks), Kotlin, Dart
- Cloud (AWS — hands-on): EC2, S3, VPC, Lambda, Auto Scaling
- AI / Machine Learning: Computer Vision, OpenCV, MediaPipe, Face Detection, Hand Gesture Recognition, Basic NLP, Prompt Engineering, TensorFlow (classification/regression practice), ML fundamentals
- Mobile/Web Frameworks: Flutter, Android App Development, Django
- Databases: SQLite3, MySQL, DynamoDB (AWS)
- Tools: Git & GitHub, Firebase Authentication, PyAutoGUI, NumPy
- Communication: English, Hindi, Marathi — presentation & cross-functional collaboration

## PROJECTS

### AI Face Detection & Hand Gesture Mouse — Python, OpenCV, MediaPipe, NumPy, PyAutoGUI

- Built a touchless, AI-powered virtual mouse enabling cursor control via real-time hand gesture and face recognition, with left/right-click gesture detection and low-latency webcam processing.
- Applied computer vision techniques for real-time hand tracking and user identification, deepening practical understanding of OpenCV and gesture recognition pipelines.

### Jarvis AI Mobile Assistant — Flutter, Dart, SQLite, Firebase Auth, Speech Recognition APIs

- Developed an Android AI assistant app with voice-controlled commands, Google Sign-In authentication, a smart dashboard, and local data storage.
- Integrated speech recognition APIs and Firebase Authentication; designed for future expansion into travel booking and task automation.

### Gym Management Mobile Application — Flutter, SQLite

- Built a full CRUD mobile application for gym member registration, workout tracking, and attendance management with local SQLite storage.
- Strengthened Flutter state management and relational data handling skills through a complete end-to-end app build.

### Machine Learning Practice — TensorFlow, Python

- Applied TensorFlow to classification and regression tasks using the Iris, Breast Cancer, and Advertising datasets, covering data preprocessing, model training, and evaluation — building foundational ML workflow experience.

## CLOUD & DEVOPS PRACTICE

- Created and managed IAM users, groups, and policies; launched and managed EC2 instances; configured VPC networking.
- Stored and managed files using Amazon S3; explored AWS Lambda for serverless computing; monitored activity with CloudTrail.
- Studied cloud migration strategies and disaster recovery concepts; practiced Kubernetes core objects (Pods, Deployments, Services) in lab environments.

## EDUCATION

**Master of Computer Applications (MCA) — Specialization: Cloud Computing** Pursuing, Expected 2027  
D Y Patil Technical Campus, Pune | CGPA: 9.0 (till date)

Relevant Coursework: Cloud Migration, Cloud API Integration Technologies, AWS Cloud Services, Virtualization, Containerization (Docker & Kubernetes), Cloud Security, Java (Core & Advanced), ITPR, AJWP

**Bachelor of Computer Science — Kankavli College, Sindhudurg**

May 2025

CGPA: 9.43 | Final Grade: 85% | Completed relevant coursework in Android Development, applying skills to deliver 3 projects or assignments demonstrating practical application.

## LEADERSHIP & ACHIEVEMENTS

---

- Recipient of the “Best Coordinator” Award (2025) for outstanding coordination and organizational contribution.
- Skill Development Coordinator, DLLE, 2023–2025 — led a 25-member student team on an Industry-Oriented Program (IOP) and Social Development project.
- Recognized on Teachers’ Day for excellent communication skills.

## CURRENTLY PURSUING / LEARNING

---

- Prompt Engineering — structured prompting techniques for GenAI tools and workflows
- AWS Cloud fundamentals — working toward hands-on proficiency in EKS, ECS, and CI/CD pipelines (Jenkins/GitHub Actions)
- Kubernetes — progressing from lab practice (Pods, Deployments, Services) toward cluster-level deployment
- AWS \_\_\_ IAM, CloudTrail, DynamoDB, EBS, EFS, Aurora, Neptune
- Containerization: Docker (images/containers), Kubernetes fundamentals (Pods, Deployments, Services, Scaling) — practiced in lab environments
- 

## AREAS OF INTEREST

---

- Cloud Infrastructure & Migration • Applied Computer Vision • Serverless Architecture • DevOps & Automation • Conversational AI / Prompt Engineering

## PROFESSIONAL TRAINING

---

- Anudip Foundation — AJWP: In progress (concluding 10Aug 2026)
- Anudip Foundation — ITPR: Completed
- CODETECH IT SOLUTIONS – Android App Development
- GIRI’s TECH Hub--SQL Bootcamp
- AWS Cloud Foundation
- AZURE Introduction of Azure Services
- IBM Cloud Computing Fundamentals course by IBM SkillsBuild
